MANAGING AUTHOR PROFILE Web Of Science

Web of Science asks authors to manage their Distinct Author Sets themselves through ResearcherID.com. Registering with ResearcherID will give you a unique author identification number that will be used by Clarivate Analytics products to differentiate your publications from those of authors with similar names. Unlike Scopus, which tries to collect information about you automatically, Web of Science wants you to enter information about your affiliation and research areas yourself. You are also asked to manually add your articles to your ResearcherID profile by either searching Web of Science or uploading an EndNote RIS file.To locate possible author matches:

1. Sign up for a ResearcherID account through the My Tools dropdown linkin Web of Science.

Do not have the Researcher ID? Just create it by using this link <u>http://www.researcherid.com/SelfRegistration.action</u>

2. Sign in with your ResearcherID login account.
